

## AWARDS

Given the 20<sup>th</sup> anniversary of the IAHR Hydraulic Structures Technical Committee in 2018, the Leadership Team decided to create the Philip H. Burgi Best Paper Award, named after the first chair of the Technical Committee. This award aims at rewarding the best technical paper presented during the International Symposium on Hydraulic Structures.

Authors aiming at applying to Philip H. Burgi Best Paper Award–ISHS 2022 should mention it when submitting their abstract. Nominated papers will be selected prior to the symposium regarding their scientific content, innovation and impact as well as link with hydraulic structures. Award winner will be selected among selected papers after oral presentations and will be announced during the ISHS banquet.

## TECHNICAL TOUR

**Tehri Dam:** It is one of the highest dams of its type in the world on the Bhagirathi River near Tehri in Uttarakhand, India. Its length is 575 m, crest width 20 m, and base width 1,128 m. The dam creates a reservoir of 4.0 km<sup>3</sup> with a surface area of 52 km<sup>2</sup>. It comprises of a 260.5 m high Earth & Rockfill dam, a Spillway System having one Chute Spillway and four Shaft Spillways designed for PMF of 15540 m<sup>3</sup>/s and a drop of 220 m and an underground Power House containing four Turbine/Generator sets of 250 MW each, designed to operate with a head variation of 90 m. Project was commissioned in 2006-07 and all four machines of Tehri Power Station are under commercial operation.

**Upper Ganga Canal:** After the disastrous Agra famine of 1837–38, in which nearly 800,000 people died, Colonel Proby Cautley, who has been affectionately remembered as a British Engineer with an Indian heart, conceived a canal irrigation system known as upper Ganga canal during the period 1840-1854. Its command area is 24000 km<sup>2</sup> and augmented flow is 297 m<sup>3</sup>/s. The system consists of main canal of 272 miles and about 4000 miles long distribution channels. The upper Ganga canal was the largest and costliest man-made waterway in the world in its opening year 1854. Various types of cross-drainage works are provided on the canal. Acciavatti writes in his book that engineers came from around the world to see such cross drainage works which outdid any canals and aqueducts that had been built before. Four major cross-drainage works are Ranipur Syphon, Pathri super passage, Dhanuri level crossing and Solani aqueduct which was ranked as one of the most remarkable massive brick masonry structure in the whole world. This canal was the reason why the first engineering college in India, the Thomason College of Civil Engineering was set up at Roorkee which was later converted into IIT Roorkee in the year 2001.

## TECHNICAL THEMES

### Storage and Diversion Structures

Dams and Weirs  
Spillways  
Intakes and outlets  
Fish passes  
Navigational locks

### Energy Dissipators

Stilling basins  
Block ramps  
Stepped spillways  
Plunge pools

### Flow Conveyance Structures

Canals, tunnels, pipes  
Penstocks & surge tanks  
Flood mitigation channels  
Gates and Valves

### Physical and Numerical Modeling

Instrumentation  
Scale effects  
Modelling of roughness & sediment  
Multiphase modelling  
Hybrid modelling  
Fluid structure interaction  
Case studies and prototype measurements

### Scour around Hydraulics Structures

Scour and sediment transport  
Aggradation and degradation  
River training and protection works

### Coastal Engineering

Ports and harbours  
Coastal and offshore structures  
Caisson & rubble mound breakwaters

### Best Practices in Risk Management

Dam safety and rehabilitation  
Risk and hazard assessment  
Sustainable design  
Adaptation to climate change

### Miscellaneous Structures

Non-linear weirs  
Pump sump  
Trench/tyrolian weirs  
Permeable weirs

### Reservoir Sedimentation

## PAPER SUBMISSION

Authors are invited to submit abstract (in English) by 28 February 2022 followed by a full paper (in English) by 20 April 2022, if the abstract is accepted. Templates for abstract and paper submission along with Instructions are available on the Symposium webpage ([www.ishs2022.iitr.ac.in](http://www.ishs2022.iitr.ac.in)). The abstracts and papers will be peer reviewed by the International Scientific Committee and all presented papers will be included in the Proceedings of the Symposium. The technical program will consider oral and poster presentations; the form of presentation for each paper will be decided upon receipt of the final version.

**Link for submission :** <https://digitalcommons.usu.edu/ishs/>

## PROCEEDINGS

All papers will be peer-reviewed for technical content by the scientific committee. Accepted and presented papers will be allocated a direct object identifier (DOI), and be published in the Proceedings. The proceedings will be indexed in Scopus and made freely available online at Utah State University Digital Commons. One registered author shall be allowed to present a maximum of two papers.

## REGISTRATION INFORMATION

	Offline Participation			Online Participation		
	Developed Countries	Developing Countries	India, Nepal, Bhutan	Developed Countries	Developing Countries	India, Nepal, Bhutan
Full delegate	450 USD	225 USD	10,000 INR	350 USD	175 USD	5,000 INR
Full delegate (IAHR members)	350 USD	175 USD	8,000 INR	250 USD	125 USD	4,000 INR
Students	200 USD	100 USD	4,000 INR	150 USD	75 USD	2,000 INR

## SPONSORSHIP

The symposium will provide an opportunity for sponsoring organizations to publicize their products/services to the participants and interact with them. Sponsorship packages for sponsoring the ISHS 2022 under Platinum, Golden, Silver and Bronze categories shall be 10000 USD, 7500 USD, 5000 USD and 2500 USD, respectively.

INVITATION

The local organizing committee is delighted to invite you to participate in the 9<sup>th</sup> International Symposium on Hydraulic Structures (ISHS 2022) to be held in **hybrid mode** at Indian Institute of Technology (IIT) Roorkee, India during 24-27 October, 2022. This symposium will bring together academia and industry from across the globe to discuss issues and solutions in the design and construction of hydraulic structures. The symposium will provide a distinctive opportunity for engineers and researchers to present their works and be mentored by senior engineers and researchers. The symposium will be organized under the aegis of IAHR, Indian Society for Hydraulics (ISH), CWC, CBIP, India.

ABOUT IIT ROORKEE

Indian Institute of Technology Roorkee is among the foremost of institutes of national importance in higher technological education and in engineering, basic and applied research. The Institute will celebrate its demisemisept-centennial in year 2022. The Department of Civil Engineering at the IIT Roorkee is the oldest and the largest in the country and is considered as the best in the country for education in Civil Engineering. It was established on October 19, 1847 as Roorkee College of Civil Engineering and renamed as the Thomason College of Civil Engineering in 1854. The department is producing several eminent engineers who are making notable contributions in the planning and execution of Civil Engineering projects in India as well as abroad. Hydraulics Laboratory of Civil Engineering was established in 1956, having a floor area of 4400 m<sup>2</sup> and a discharge of 1.0 m<sup>3</sup>/s and equipped with state-of-art equipments.

TRAVEL INFORMATION

Roorkee is a city in North India and spread over a flat terrain under Sivalik Hills of Himalayas. The city is developed on the banks of Ganges Canal, its dominant feature, which flows from north–south through middle of the city. It is well connected with New Delhi, the capital of India by train (<https://etrain.info/in>) and road. Nearest domestic airport is about 60 km from Roorkee at Dehradun while International airport is Indira Gandhi International (IGI) Airport, New Delhi, which is about 200 km from Roorkee. A cab takes about four hour to travel from IGI airport to Roorkee and about one and half hour from Dehradun Aiport to Roorkee.

SYMPOSIUM FORMAT

The Symposium would be four days in duration. A workshop shall be organized on the first day while next two days will be dedicated to ISHS technical sessions, including keynote addresses. The final day will be a technical field tour.

TIME SCHEDULE

Abstract submission	:	28 February 2022
Abstract acceptance	:	01 March 2022
Full paper submission	:	20 April 2022
Notification of acceptance	:	25 May 2022
Revised papers submission	:	01 July 2022
Notification of final acceptance	:	05 August 2022
Registration Opens	:	10 August 2022
Registration Closing	:	30 September 2022
Technical Tour	:	24 October 2022
Workshop	:	25 October 2022
Symposium	:	26-27 October 2022

IAHR HYDRAULIC STRUCTURES COMMITTEE

Brian Crookston (Chair), Utah State University, USA  
Stefan Felder (Vice-Chair), University of New South Wales, Australia  
Sebastien Erpicum (Past Chair), Liege University, Belgium  
Fabian Bombardelli, University of California, Davis, USA  
Valentin Heller, The University of Nottingham, UK  
Sean Mulligan, VorTech Water Solutions and NUI Galway, Ireland  
Mario Oertel, Helmut-Schmidt-University Hamburg, Germany  
Daniel Valero Huerta, IHE Delft, The Netherlands  
Z. Ahmad (Co-opted), IIT Roorkee, India  
Elena Pummer (Co-opted), NTNU, Norway

LOCAL ORGANISING COMMITTEE

Ajit K. Chaturvedi (Patron)	Praveen Kumar (Co-Patron)
Zulfequar Ahmad (Conference Chair)	Ajay K. Singh
Ajay Pradhan	Arun Kumar
Ashish Pandey	C S P Ojha
K S Hariprasad	N K Goel
P K Sharma	R Vinnarasi

INTERNATIONAL SCIENTIFIC COMMITTEE

Michele Palermo (Chair), University of Pisa, Italy  
Abdorreza Kabiri-Samani, Isfahan University of Technology, Iran  
Ajay K. Singh, NTPC, India  
Ajay Pradhan, Cetus Consulting Solution Services Private Limited, India  
Akbar Safarzadeh, University of Mohaghegh Ardabili, Iran  
Alessandro Valiani, University of Ferrara, Italy  
Anton J. Schleiss, EPFL, Switzerland

Arturo Marcano, CVG EDELCA, Venezuela  
Arun Kumar, IIT Roorkee, India  
Benjamin Dewals, Liege University, Belgium  
Benjamin Hohermuth, ETH Zurich, Switzerland  
Blake Tullis, Utah State University, USA  
Brian Crookston, Utah State University, USA  
Brown Jesse, U.S. Army Corps of Engineers, USA  
Bruce Melville, Auckland University, New Zealand  
Cabrera Juan, Universidad Nacional de Ingenieria, Portugal  
Cecilia Lopardo, Istituto National del Agua, Argentina  
Chandrashekhar Ojha, IIT Roorkee, India  
Claudio Fattor, Istituto National del Agua, Argentina  
Cristián Escauriaza, Universidad Católica de Chile, Chile  
Daniel B. Bung, Aachen University of Applied Sciences, Germany  
Daniel Valero Huerta, IHE Delft, The Netherlands  
Deep Roy, University of Pisa, Italy  
Dipankar Roy, Madanapalle Institute of Technology and Science, India  
Fabian Bombardelli, University of California, Davis, USA  
Feimster Laura, Schnabel Engineering, USA  
Francesco Granata, Università degli studi di Cassino e del Lazio Meridionale, Italy  
Giuseppe Oliveto, Università degli studi della Basilicata, Italy  
Hazi Azamathulla, University of the West Indies, Trinidad  
Hotchkiss Rollin, Brigham Young University, USA  
Hubert Chanson, University of Queensland, Australia  
Iacopo Carnacina, Liverpool John Moores University, UK  
Isabella Schalko, ETH Zurich, USA  
James Yang, Royal Institute of Technology, Sweden  
Jorge Matos, University of Lisbon, Portugal  
Jorge D. Bacchiega, Istituto National del Agua, Argentina  
Jose M. Adriasola V., Betchel Corporation, Chile  
José M. Carrillo, Universidad Politecnica de Cartagena, Spain  
Juan Pablo Toro Labbe, Universidad Andres Bello, Chile  
Khodier Mohanad, Yarmouk University, Jordan  
Kramer Matthias, UNSW Canberra, Australia  
KS Hariprasad, IIT Roorkee, India  
Lesleighter Eric, Lesleighter Consulting, Australia  
Luis G. Castillo, Universidad Politecnica de Cartagena, Spain  
Mario Oertel, Helmut-Schmidt-University Hamburg, Germany  
Masoud Ghodsian, Tarbiat Modares University, Iran  
Mazurek Kerry, University of Saskatchewan, Canada  
Michael Pfister, University of Applied Sciences and Arts Western Switzerland HES-SO, Switzerland

Moran Rafael, Universidad Politecnica de Madrid, Spain  
Mortensen Joshua, U.S. Bureau of Reclamation, USA  
Narendra K. Goel, IIT Roorkee, India  
Neff Keil, Stantec, USA  
Nils Ruther, NTNU, Norway  
Óscar Link, Universidad de Concepción, Chile  
Pablo Spalletti, Istituto National del Agua, Argentina  
Patricio A. Moreno-Casas, University of the Andes, Chile  
Phillips Michael, U.S. Army Corps of Engineers, USA  
Pramod K. Sharma, IIT Roorkee, India  
Prem L. Patel, SVNIT Surat, India  
Rajib Das, Jadavpur University, India  
Rita Carvalho, University of Coimbra, Portugal  
Robert Boes, ETH Zurich, Switzerland  
Robert Janssen, Betchel, Australia  
Roshni Thendiyath, National Institute of Technology Patna, India  
Ruswick Kevin, Schnabel Engineering, USA  
Sahameddin Mahmoudi Kurdistani, IA.ING - Hydraulic Division, Italy  
Sanjay Giri, Deltares, The Netherlands  
Sean Mulligan, National University of Ireland, Galway, Ireland  
Sebastien Erpicum, Liege University, Belgium  
Seyed Haji, South Florida Water Management District, USA  
Silke Wieprecht, University of Stuttgart, Germany  
Silvia Meniconi, Università degli Studi di Perugia, Italy  
Simone Pagliara , ETH Zurich, Switzerland  
SK Zeeshan Ali, IIT Hyderabad, India  
Stefan Felder, University of New South Wales, Australia  
Stefano Pagliara, Universty of Pisa, Italy  
Subhasish Das, Jadavpur University, India  
Subhasish Dey, IIT Kharagpur, India  
Teal Marty, West Consultants, USA  
Thanos Papanicolaou, Northwest hydraulic consultants, USA  
Valentin Heller, The University of Nottingham, UK  
Vito Ferro, University of Palermo, Italy  
Wahl Tony, U.S. Bureau of Reclamation, USA
